Removing the debris and demolition the remainder of any structures from your site requires a permit from the City of Santa Barbara's Building & Safety Division. This permit can be issued to any "B" licensed General Contractor or to the homeowner. You must, however, hire a company to haul away the debris that is licensed by the City's Environmental Services Division.

For a list of currently licensed haulers, visit the following web site;

[http://www.santabarbaraca.gov/Recycling-Trash/basic\\_construction.htm#hauler](http://www.santabarbaraca.gov/Recycling-Trash/basic_construction.htm#hauler)

The permit may be obtained at our office at 630 Garden St. You will need to bring a simple sketch of the outline of the property, an outline of all of the structures that were destroyed and/or remaining on the property, and the name of the hauler you will be using.

An 8 ½" x 11" sized drawing is adequate and we will help you get through the process "over-the-counter".

If you are using a licensed contractor, **and we highly recommend this**, please send them in with the drawing to get the permit.

**PLEASE NOTE – SB County Air Pollution Control District is warning that this material should be treated as hazardous.** There may be asbestos as well as electronic waste, batteries, and other potentially harmful substances buried in the debris. At a minimum, the amounts of ash disturbed by clean-up activities could be harmful to your lungs. PLEASE take every precaution to protect yourself while you are working, or in the area of sites being cleaned up/

If you are a hauler and want to get on the list, here is some additional information;
